Data Source: http://highered.colorado.gov/i3/HSGrads.aspx

Beginning in academic year 2008-2009, SURDS data collection included state assigned student identification (SASID) that is assigned to students enrolled in public K-12 schools. With the addition of this data, a direct link between secondary and post-secondary has been established.

Not included in this data are students graduating from non-public high schools, students enrolling in Colorado private colleges, students enrolling in college outside Colorado and other high school graduates who could not be matched.

"Not Found" describes a population not found in enrollment data submitted from a public Colorado institution. Students in this group could be either 1) enrolled in a public institution in Colorado, but not linked due to a missing SASID value, 2) enrolled in a private, seminary or occupational college in Colorado, 3) enrolled in any college or university outside of Colorado or 4) not enrolled in any post-secondary institution.
