

GET ON TRACK WITH PROJECT MANAGEMENT

Project managers are in high demand in a wide variety of industry sectors – biotechnology, construction, engineering, information systems, manufacturing, and telecommunications, to name a few. Project management skills also can be beneficial to anyone who owns a small business.

Learn the **basic tools and skills** to implement project management **planning** with a Certificate in Project Management.

- One semester
- Three 7½-week classes will allow you to complete this certificate
- Evening classes so you can continue to work as you learn
- The first step toward national Project Management Institute certification
- Ask us about internships
